

§ 670.37 Content of permit application.

Applications for the introduction of non-indigenous species into Antarctica must describe:

- (a) The species, numbers, and if appropriate, the age and sex, of the species to be introduced into Antarctica;
- (b) The need for the species;
- (c) What precautions the applicant will take to prevent escape or contact with native fauna and flora; and
- (d) How the species will be removed from Antarctica or destroyed after they have served their purpose.
