Item Rationale

Health-related Quality of Life

- Resident interview is preferred as it most accurately reflects what the resident views as important. However, a small percentage of residents are unable or unwilling to complete the interview for Daily and Activity Preferences.

- Persons unable to complete the preference interview should still have preferences evaluated and considered.

Planning for Care

- Even though the resident was unable to complete the interview, important insights may be gained from the responses that were obtained, observing behaviors, and observing the resident's affect during the interview.
