

## **G642**

**(Rev. 182, Issued: 09-28-18, Effective: 09-28-18, Implementation: 09-28-18)**

### **§484.65(a) Standard: Program scope.**

**484.65(a)(1) The program must at least be capable of showing measurable improvement in indicators for which there is evidence that improvement in those indicators will improve health outcomes, patient safety, and quality of care.**

**§484.65(a)(2) The HHA must measure, analyze, and track quality indicators, including adverse patient events, and other aspects of performance that enable the HHA to assess processes of care, HHA services, and operations.**

### **Interpretive Guidelines §484.65(a)(2)**

The HHA selects the indicators that it will utilize in its QAPI program based upon identified adverse or negative patient outcomes or agency processes that the HHA wishes to monitor and measure. Each indicator must be measurable through data in order to evaluate any HHA change in procedure, policy or intervention.

The HHA QAPI program must include procedures for measurement and analysis of indicators and address the frequency with which such measurement and analysis will occur.

Per §484.70(b) the HHA must maintain a coordinated agency-wide program for the surveillance, investigation, identification, prevention, control and investigation of infectious and communicable diseases as an integral part of the QAPI program.
