

J0700: Should the Staff Assessment for Pain be Conducted?

J0700. Should the Staff Assessment for Pain be Conducted?

Enter Code

☐

0. **No** (J0410 = 1 thru 4) → Skip to J1100, Shortness of Breath (dyspnea)
1. **Yes** (J0410 = 9) → Continue to J0800, Indicators of Pain or Possible Pain

Item Rationale

Item J0700 closes the pain interview and determines if the resident interview was complete or incomplete and based on this determination, whether a staff assessment *should* be completed.

Health-related Quality of Life

Resident interview for pain is preferred because it improves the detection of pain. However, a small percentage of residents are unable or unwilling to complete the pain interview.

Persons unable to complete the pain interview may still have pain.

Planning for Care

Resident self-report is the most reliable means of assessing pain. However, when a resident is unable to provide the information, staff assessment is necessary.

Even though the resident was unable to complete the interview, important insights may be gained from the responses that were obtained, observing behaviors and observing the resident's affect during the interview.

DEFINITION

COMPLETED **PAIN ASSESSMENT** INTERVIEW

The **Pain Assessment Interview** is successfully completed if the resident reported no pain (J0300 = **0. No**), or if the resident reported pain (J0300 = **1. Yes**) and the follow-up

Steps for Assessment

The **Staff Assessment for Pain** should only be completed if the **Pain Assessment Interview** (J0300–J0600) was not completed.

Coding Instructions for J0700. Should the Staff Assessment for Pain be Conducted?

Code 0, no: if the resident completed the **Pain Assessment Interview** item (J0410 = 1, 2, 3, or 4). Skip to **Shortness of Breath (dyspnea)** item (J1100).
