

## **388-97-1915 PASRR requirements prior to admission of new residents**

Prior to every admission of a new resident, the nursing facility must:

### **(1)**

Verify that a PASRR level I screening has been completed, and deny admission until that screening has been completed.

### **(2)**

Verify that a PASRR level II evaluation has been completed when the individual's PASRR level I screening indicates that the individual may have serious mental illness and/or intellectual disability or related condition, and deny admission until that evaluation has been completed, unless all three of the following criteria apply and are documented in the PASRR level I screening: (a) The individual is admitted directly from a hospital after receiving acute inpatient care; (b) The individual requires nursing facility services for the condition for which he or she received care in the hospital; and (c) The individual's attending physician has certified that the individual is likely to require fewer than thirty days of nursing facility services.

#### **(a)**

The individual is admitted directly from a hospital after receiving acute inpatient care;

#### **(b)**

The individual requires nursing facility services for the condition for which he or she received care in the hospital; and

**(c)**

The individual's attending physician has certified that the individual is likely to require fewer than thirty days of nursing facility services.

**(3)**

Decline to admit any individual whose PASRR level II evaluation determines that he or she does not require nursing facility services or that a nursing facility placement is otherwise inappropriate.

**(4)**

Coordinate with PASRR evaluators to the maximum extent practicable in order to avoid duplicative assessments and effort, and to ensure continuity of care for nursing facility residents with a serious mental illness and/or an intellectual disability or related condition.
