

## **70543 Pediatric Service Space**

### **(a)**

Beds in the pediatric unit, including bassinets, cribs and youth beds, shall be included in the total licensed bed capacity of the hospital.

### **(b)**

The rooms for pediatric patients shall be located to provide adequate observation by nursing and other personnel.

### **(c)**

Rooms for infants under the age of three years shall be separate from those of older children.

### **(d)**

A private room shall be available for any pediatric patient in need of physical separation as defined by the infection control committee.

### **(e)**

An examination and treatment room shall be located in or adjacent to the pediatric unit.

### **(f)**

A play area of sufficient size should be provided.
