Office for Enterprise Data and Analytics (OEDA)

PDP Partners,

The CMS Office for Enterprise Data and Analytics (OEDA) has developed an Application Programming Interface (API) known as the AB2D API to securely provide stand-alone Prescription Drug Plan (PDP) Sponsors with Medicare Parts A and B claims data for their active enrollees. Officially launched in August 2020, the API has now served PDPs with claims data for over 6.5M beneficiaries!

AB2D data has the potential to transform how PDP sponsors coordinate care, monitor treatment effectiveness, and access patient's medical history.

Take action today! Attestation is the first step to on-board with the AB2D API and it only takes a few minutes to complete. Beneficiary data is only available from the day your organization Attests, so start your journey now by logging in to HPMS and Attesting!

If you have already attested, your organization is only a few steps away from completing our on-boarding process and gaining access to our API. Please check out the AB2D Onboarding Process document attached in this email or check out the AB2D website at ab2d.cms.gov for more details!

Have you heard? AB2D has recently released improved synthetic data that is now available in our sandbox environment for your testing purposes. This new data is a more accurate representation of AB2D production data containing a more realistic distribution of disease and demographic information. Instructions on how to access this data are available in the sandbox environment user guides found in Step 4 of our website's [Accessing Claims Data](#) page.

Please let us know if you have any questions! Our email address is ab2d@semanticbits.com
