

53702 Liability Offset

(a)

The Director shall consult with the plan in developing a schedule for offset of any unpaid liability against future capitation payments.

(b)

The schedule shall be developed to minimize the impact of offset on the plan's cash flow. An individual claim shall not be liquidated by offset against fewer than two nor more than six of the next monthly capitation payments.

(c)

The offset from each capitation payment shall be immediately forwarded to the appropriate provider.
