

64690.10 Data Reporting

Each system shall report the following within the first 10 days after the end of each period during which such sampling or monitoring was conducted:

(a)

For lead and copper tap sampling: (1) The results of all tap samples including the location of each site and the associated tier criteria from section 64676 (Sample Site Selection); (2) The 90th percentile lead and copper concentrations calculated pursuant to section 64678 (Determination of Exceedances of Lead and Copper Action Levels); and (3) With the exception of the first period of tap sampling, an identification of any site that was not sampled during previous periods, along with an explanation of why the sampling site was changed;

(1)

The results of all tap samples including the location of each site and the associated tier criteria from section 64676 (Sample Site Selection);

(2)

The 90th percentile lead and copper concentrations calculated pursuant to section 64678 (Determination of Exceedances of Lead and Copper Action Levels); and

(3)

With the exception of the first period of tap sampling, an identification of any site that was not sampled during previous periods, along with an explanation of why the sampling site was changed;

(b)

For WQP monitoring, the results of all samples collected and analyzed pursuant to article 4 (WQP Monitoring) of this chapter;

(c)

For source water monitoring: (1) The results for all samples related to source water collected and analyzed under article 6 (Source Water Requirements for Action Level Exceedances) of this chapter; and (2) With the exception of the first round of sampling related to source water, an identification of any site that was not sampled during previous periods along with an explanation of why the sampling point was changed; and

(1)

The results for all samples related to source water collected and analyzed under article 6 (Source Water Requirements for Action Level Exceedances) of this chapter; and

(2)

With the exception of the first round of sampling related to source water, an identification of any site that was not sampled during previous periods along with an explanation of why the sampling point was changed; and

(d)

The results for any samples collected and analyzed for lead and copper or WQPs in addition to those required by this chapter.
