Section 66264.198@ Special Requirements for Ignitable or Reactive Wastes

66264.198 Special Requirements for Ignitable or Reactive Wastes

(a)

Ignitable or reactive waste shall not be placed in tank systems, unless:(1) the waste is treated, rendered, or mixed before or immediately after placement in the tank system so that:(A) the resulting waste, mixture, or dissolved material no longer meets the definition of ignitable or reactive waste under sections 66261.21 or 66261.23 of this division, and (B) section 66264.17(b) is complied with; or (2) the waste is transferred, stored or treated in such a way that it is protected from any material or conditions that may cause the waste to ignite or react; or (3) the tank system is used solely for emergencies.

(1)

the waste is treated, rendered, or mixed before or immediately after placement in the tank system so that:(A) the resulting waste, mixture, or dissolved material no longer meets the definition of ignitable or reactive waste under sections 66261.21 or 66261.23 of this division, and (B) section 66264.17(b) is complied with; or

(A)

the resulting waste, mixture, or dissolved material no longer meets the definition of ignitable or reactive waste under sections 66261.21 or 66261.23 of this division, and

(B)

section 66264.17(b) is complied with; or

(2)

the waste is transferred, stored or treated in such a way that it is protected from any material or conditions that may cause the waste to ignite or react; or

(3)

the tank system is used solely for emergencies.

(b)

The owner or operator of a facility where ignitable or reactive waste is transferred, stored or treated in a tank shall comply with the requirements for the maintenance of protective distances between the waste management area and any public ways, streets, alleys, or an adjoining property line that can be built upon as required in Tables 2-1 through 2-6 of the National Fire Protection Association's "Flammable and Combustible Liquids Code," (1981), (incorporated by reference, see section 66260.11).
