Section 66271.12@ Obligation to Raise Issues and Provide Information During the Public Comment Period

## **66271.12 Obligation to Raise Issues and Provide Information During the Public Comment Period**

All persons, including applicants, who believe any condition of a draft permit is inappropriate or that the Department's tentative decision to deny an application or prepare a draft permit is inappropriate, must raise all reasonably ascertainable issues and submit all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period (including any public hearing) under section 66271.9 . All supporting materials shall be included in full and may not be incorporated by reference, unless they are already part of the administrative record in the same proceeding, or consist of State or Federal statutes and regulations, Department or USEPA documents of general applicability, or other generally available reference materials. Commenters shall make supporting material not already included in the administrative record available to the Department as directed by the Department. A comment period longer than 45 days may be necessary to give commenters a reasonable opportunity to comply with the requirements of this section. Additional time shall be granted under section 66271.9 to the extent that a commenter who requests additional time demonstrates the need for such time.
