Article 3@ Standards for Universal Waste Handlers

|->

Section 66273.35@ Accumulation Time Limits

66273.35 Accumulation Time Limits

(a)

A universal waste handler shall accumulate universal waste for no longer than one year from the date the universal waste was generated, or was received from another universal waste handler.

(b)

A universal waste handler shall be able to demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received. The universal waste handler may make this demonstration by: (1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received; (2) Marking or labeling the individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received; (3) Maintaining an inventory system onsite that identifies the date the universal waste being accumulated became a waste or was received; (4) Maintaining an inventory system onsite that identifies the earliest date that any universal waste in a group of items of universal waste or a group of containers of universal waste became a waste or was received; (5) Placing the universal waste in a specific accumulation area and marking or labeling the area to identify the earliest date that any universal waste in the area became a waste or was received; or (6) Any other method which clearly demonstrates the length of time that the universal

waste has been accumulated from the date it became a waste or was received.

(1)

Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received;

(2)

Marking or labeling the individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received;

(3)

Maintaining an inventory system onsite that identifies the date the universal waste being accumulated became a waste or was received;

(4)

Maintaining an inventory system onsite that identifies the earliest date that any universal waste in a group of items of universal waste or a group of containers of universal waste became a waste or was received;

(5)

Placing the universal waste in a specific accumulation area and marking or labeling the area to identify the earliest date that any universal waste in the area became a waste or was received; or

(6)

Any other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it became a waste or was received.
