Section 67384.8@ Special Best Management Practices for Flares and Pyrotechnic Perchlorate Materials

67384.8 Special Best Management Practices for Flares and Pyrotechnic Perchlorate Materials

(a)

Road safety flares shall be used in a manner that minimizes releases of perchlorate to the environment. The following practices shall be implemented to the extent practical without impeding immediate safety considerations: (1) Flares should be allowed to burn completely; (2) Flares used in an emergency incident shall be limited in number and duration necessary to ensure safety; and (3) All personnel who routinely use flares in the normal course of employment should receive instruction on the potential environmental hazards associated with the use of perchlorate materials and on the perchlorate Best Management Practice requirements of this chapter.

(1)

Flares should be allowed to burn completely;

(2)

Flares used in an emergency incident shall be limited in number and duration necessary to ensure safety; and

(3)

All personnel who routinely use flares in the normal course of employment should receive instruction on the potential environmental hazards associated with the use of perchlorate materials and on the perchlorate Best Management Practice requirements

of this chapter.

(b)

Marine safety flares shall be used in a manner that minimizes releases of perchlorate to the environment.

(c)

Within twenty-four (24) hours of a public display of fireworks or the use of dangerous fireworks, the pyrotechnics operator, in addition to complying with title 19 of the California Code of Regulations, section 1003, shall, to the extent practical, collect any stars and un-ignited pyrotechnic material found during the required inspection of the entire firing range.
