

69406.3 Flammability

(a)

The flammability hazard trait is defined as hazards due to substances that ignite or heat under certain conditions, causing burns or fire.

(b)

Evidence for this hazard trait includes, but is not limited to, meeting the definition of flammable aerosol, flammable gas, flammable liquid, or flammable solid in 29 CFR, Occupational Safety and Health Standards, Part 1910, subpart Z, Toxic and Hazardous Substances, Standard number 1910.1200; meeting the criteria for being a flammable gas in section 2.3, liquid in section 2.6, solid in section 2.7, or aerosol in section 2.3; pyrophoric liquid in section 2.9 or solid in section 2.10; self-reactive substance or mixture in section 2.8; self-heating substance or mixture in section 2.11; substance or mixtures which, in contact with water, emit flammable gases in section 2.12; or types C through F organic peroxides in section 2.15 of the Globally Harmonized System of Classification and Labeling of Chemicals.
