

## **71647 Storage and Disposal of Solid Wastes**

### **(a)**

Solid wastes shall be stored and eliminated in a manner to preclude the transmission of communicable disease. These wastes shall not be a nuisance or provide a breeding place for insects or rodents nor shall it be a food source for either.

### **(b)**

Solid waste containers shall be stored and located in a manner that will protect against odors.

### **(c)**

Syringes and needles, before being discarded into waste containers, shall be rendered unusable.
