

73641 Storage and Disposal of Solid Waste

(a)

Solid wastes shall be stored and eliminated in a manner to preclude the transmission of communicable disease. These wastes shall not be a nuisance or a breeding place for insects or rodents nor be a food source for either.

(b)

Solid waste containers shall be stored and located in a manner that will protect against odors.

(c)

Syringes and needles, before being discarded into waste containers, shall be rendered unusable.
