Section 73625@ Nursing Stations

73625 Nursing Stations

(a)

Nursing stations shall be maintained in each nursing unit or building.

(b)

Nursing stations shall be maintained with a cabinet, a desk, space for records, a bulletin board, a telephone and a specifically designated and well-illuminated medicine storage compartment with a lockable door. If a separate medicine room is maintained, it shall have a lockable door and a medicine sink with water connections. If a nourishment refrigerator is used, the following standards shall apply: (1) Be located in a clean area not subject to contamination by human waste and subject to the same conditions specified in Section 73337(c). (2) Maintain temperatures at or below 7°C (45°F) for chilling. (3) Maintain freezer at or below minus 7°C (20°F). (4) Have a reliable thermometer in refrigerator at all times. (5) Food in the refrigerator subject to the same conditions as specified in Section 73345(b)(6).

(1)

Be located in a clean area not subject to contamination by human waste and subject to the same conditions specified in Section 73337(c).

(2)

Maintain temperatures at or below 7°C (45°F) for chilling.

(3)

Maintain freezer at or below minus 7°C (20°F).

(4)

Have a reliable thermometer in refrigerator at all times.

(5)

Food in the refrigerator subject to the same conditions as specified in Section 73345(b)(6).
