

75039 Drug Distribution Service-Equipment and Supplies

(a)

Each clinic which provides drug distribution services shall maintain the equipment and supplies necessary to perform this service. These shall include but not be limited to the following: (1) The clinic shall maintain a separate portable and sealed supply of drugs for emergency use, which meets the following: (A) The drugs included in the emergency drug supply shall be determined by the professional director and the licensed nurse. A pharmacist may also be included in determination of the emergency drug supply contents. (B) The contents of the supply shall be listed on the outside of the container. (C) The supply shall be checked and logged at least monthly to ensure appropriate replenishment of drug supply and to ensure that drugs are not outdated. (2) Equipment and supplies used in drug repackaging, administering or dispensing shall be clean. Syringes, needles and related equipment shall be sterile. Equipment and supplies shall include: (A) Refrigerator with a dependable thermometer. (B) Lockable drug cabinets, drawers, closets or rooms. (C) Drug preparation counter area and convenient water source. (D) Syringes, needles, rubber tubing, clamps, droppers, medicine glasses or cups.
