

# § 76653. Storage and Disposal of Solid Waste.

---

(a) Solid wastes shall be stored and eliminated in a manner to preclude the transmission of communicable disease. These wastes shall not be a nuisance or a breeding place for insects or rodents nor be a food source for either.

(b) Solid waste containers shall be stored and located in a manner that will eliminate odors into client areas.

(c) Syringes and needles, before being discarded into waste containers, shall be rendered unusable.

Note: Authority cited: Section 208(a), Health and Safety Code. Reference: Section 1276, Health and Safety Code.
