Section 86521@ Water Supply

86521 Water Supply

(a)

All crisis nurseries where water for human consumption is from a private water source shall meet the following requirements: (1) As a condition of initial licensure, the applicant shall provide evidence of an on-site inspection of the private water source and a bacteriological analysis which establishes the safety of the water, conducted by the local health department, the California Department of Public Health, or a licensed commercial laboratory. (2) Subsequent to initial licensure, the licensee shall provide evidence of a bacteriological analysis of the private water source as frequently as necessary to ensure childrens' safety, but no less frequently than specified in the following table:

	LICENSED
CAPACITYANALYSIS REQUIRED	PERIODIC SUBSEQUENT ANALYSIS
	6 or fewer
Initial Licensing	Not required unless evidence supports the need for such analysis to protect clients.
	7 through 14
Initial Licensing	Annually

(1)

As a condition of initial licensure, the applicant shall provide evidence of an on-site inspection of the private water source and a bacteriological analysis which establishes the safety of the water, conducted by the local health department, the California Department of Public Health, or a licensed commercial laboratory.

(2)

Subsequent to initial licensure, the licensee shall provide evidence of a bacteriological

analysis of the private water source as frequently as necessary to ensure childrens' safety, but no less frequently than specified in the following table: LICENSED
