

89421 Water Supply Clearance

(a)

Any home where water for human consumption is from a private source shall meet the following requirements: (1) Before the caregiver accepts the first placement, the caregiver shall provide evidence of an on-site inspection of the source of water and a bacteriological analysis which establishes the safety of the water, conducted by the local health department, the State Department of Public Health, or a licensed commercial laboratory. (2) After the caregiver accepts the first placement, the caregiver shall be required to provide additional analyses of the source of water only when the licensing agency documents the need for an analysis to assure the health and safety of children.

(1)

Before the caregiver accepts the first placement, the caregiver shall provide evidence of an on-site inspection of the source of water and a bacteriological analysis which establishes the safety of the water, conducted by the local health department, the State Department of Public Health, or a licensed commercial laboratory.

(2)

After the caregiver accepts the first placement, the caregiver shall be required to provide additional analyses of the source of water only when the licensing agency documents the need for an analysis to assure the health and safety of children.
