

97245 Online Test Option

Reports may be tested before formal submission to the Department using the online test option. Online testing of the format and reports through the online test option, before formal transmission, is the recommended means of ensuring compliant data that meets the standards established by the Department before the due date.

Reports tested through the online test option will be subject to the same processing and will generate the same reports as data that is formally submitted. The format and reports may be tested through the test option as many times as needed to assure that the reports meet the standards established by the Department in Section 97247 .
