

## **97570.5 Continuous Safe Structural Operation**

Each Postsurgical Recovery Care Facility shall be maintained in a safe structural condition. If the Office determines in a written report submitted to the designee that an evaluation of the structural condition is necessary, the designee may be required to submit a report by a licensed structural engineer which shall establish a basis for eliminating or correcting the structural conditions which may be hazardous to occupants. The designee shall eliminate or correct any hazardous conditions.
