

## **100200.03 Poison Control Center**

"Poison control center" or "PCC" or "regional poison control center" or "regional poison center" means a facility designated by the EMS Authority that provides information and advice to the public and health professionals regarding the management of individuals who have or may have ingested or otherwise been exposed to poisonous or possibly toxic substances. This information and advice shall be given by the medical director, program director, specialist in poison information, poison information provider, or a poison center specialty consultant as defined in Section 100201.03 .
