

## **100830 Funding Formula**

### **(a)**

Weatherization Services. The State shall designate service areas and provide funds to contractors for weatherization services based on the following factors: (1) A service area shall contain no less than fifty thousand (50,000) people as established by the latest available United States Census, but in no case shall a currently established service area be reduced in size nor an agency presently funded under this Chapter which does not meet the criteria of this subsection be declared ineligible. (2) A minimum funding level for each service area shall be no less than \$65,000 except in the event of a federal grant reduction which exceeds twenty (20) percent of the prior year federal allocation. Should a federal grant reduction exceed twenty (20) percent of the prior year federal allocation, the minimum funding level shall be reduced. (3) Funds may be targeted and made available to provide weatherization services to special population groups as needs are identified. (4) The remaining funds shall be distributed by service area utilizing a formula which includes, at a minimum, the following: (A) Low-income population; (B) Energy costs; and (C) Heating and cooling degree days.

### **(1)**

A service area shall contain no less than fifty thousand (50,000) people as established by the latest available United States Census, but in no case shall a currently established service area be reduced in size nor an agency presently funded under this Chapter

which does not meet the criteria of this subsection be declared ineligible.

**(2)**

A minimum funding level for each service area shall be no less than \$65,000 except in the event of a federal grant reduction which exceeds twenty (20) percent of the prior year federal allocation. Should a federal grant reduction exceed twenty (20) percent of the prior year federal allocation, the minimum funding level shall be reduced.

**(3)**

Funds may be targeted and made available to provide weatherization services to special population groups as needs are identified.

**(4)**

The remaining funds shall be distributed by service area utilizing a formula which includes, at a minimum, the following: (A) Low-income population; (B) Energy costs; and (C) Heating and cooling degree days.

**(A)**

Low-income population;

**(B)**

Energy costs; and

**(C)**

Heating and cooling degree days.

**(b)**

ECIP Services. The State shall designate service areas and provide funds to contractors for ECIP services based on the following factors: (1) A service area shall contain no less than fifty thousand (50,000) people as established by the latest available United States Census, but in no case shall a currently established service area be reduced in size nor an agency presently funded under this Chapter which does not meet the criteria of this subsection be declared ineligible. (2) A

minimum funding level for each service area shall be no less than \$85,000 except in the event of a federal grant reduction which exceeds twenty (20) percent of the prior year federal allocation. Should a federal grant reduction exceed twenty (20) percent of the prior year federal allocation, the minimum funding level shall be reduced. (3) The remaining funds shall be distributed by service area utilizing a formula which includes, at a minimum, the following: (A) Low-income population; (B) Energy costs; and (C) Heating and cooling degree days.

**(1)**

A service area shall contain no less than fifty thousand (50,000) people as established by the latest available United States Census, but in no case shall a currently established service area be reduced in size nor an agency presently funded under this Chapter which does not meet the criteria of this subsection be declared ineligible.

**(2)**

A minimum funding level for each service area shall be no less than \$85,000 except in the event of a federal grant reduction which exceeds twenty (20) percent of the prior year federal allocation. Should a federal grant reduction exceed twenty (20) percent of the prior year federal allocation, the minimum funding level shall be reduced.

**(3)**

The remaining funds shall be distributed by service area utilizing a formula which includes, at a minimum, the following: (A) Low-income population; (B) Energy costs; and (C) Heating and cooling degree days.

**(A)**

Low-income population;

**(B)**

Energy costs; and

**(C)**

Heating and cooling degree days.
